

## Ball Trial Report

We tried to compile all relevant information, but we only make it available to members after the voting has ended, to ensure that our findings do not influence their opinions.

**Weight:**

Dunlop ATP	Babolat Gold	Wilson US Open	Head Tour	Dunlop AO
				
59 grams	57,5 grams	58,5 grams	61 grams	58 grams

**Bounce ,consistency and feel after 2 days usage**

Dunlop ATP	Babolat Gold	Wilson US Open	Head Tour	Dunlop AO
				
<p>Whilst fluffy in appearance the ball remains playable, consistent and bounces well. The balls feel much softer on the arm than Head Tour and Wilson. A softer rubber compound is used. We cut some balls to validate that.</p>	<p>The balls gest less fluffy that the Dunlop and Head but it loses consistency and bounce a b it quicker. The ball does not feel very harsh on the arm.</p>	<p>The ball does not get very fluffy, but it feels harder than the Dunlops. It feels the most pressurised and the rubber compound used is harder than the Dunlops. We cut some balls to validate that</p>	<p>The ball gets super fluffy and very heavy. Definitely not a good ball in winter as rubber compound is harder. Also, the ball is heavier to start with. The bounce is not very good and uniform especially in cold weather.</p>	<p>The ball does not get super fluffy, it bounces well it stays consistent and it uses a rubber compound which is softer on the arm than the Wilson. We cut some balls to validate that</p>

### Visual Appearance after 2 days usage

It will be obvious from the pictures that the Dunlop ATP and the Head Tour are the fluffiest balls after 2 days of usage.

#### Dunlop ATP

Fresh and after 2 days in play.

## Babolat Gold

Fresh and after 2  
days in play.

## Wilson US Open

Fresh and after 2 days in play.

## Head Tour

Fresh and after 2  
days in play.

## Dunlop AO

Fresh and after 2  
days in play.

All balls side by side  
Fresh vs used.

## Net vs Tube

### Option 1

After 2 months 10 nets with balls went missing.  
Also, some members put 6 balls in each net which leaves other with only 2 balls. We have to purchase those nets

### Option 2

We have recycled the tennis cans which the balls come in (they are free and we reduce what we throw away). Also, they can only fit 4 balls.
